

RELEASE NOTES

January 2015 Release Notes

January updates include:

- **Castlight Dental**
- **Sorting/filtering by preferred providers**
- **SB1340 – CA Provider pricing audits**

Castlight Dental

We are pleased to announce that Castlight Dental was launched on January 1. This is an exciting new product developed by Castlight, which we anticipate having as much success as the core Medical offering.

- Customers who have purchased Castlight Dental will enjoy a best-in-class shopping experience similar to Castlight Essentials

Sorting/filtering by preferred providers

Castlight is adding the ability to specify narrow networks, including expanded sorting and a default on/off option per employer plan.

- Castlight will now provide users with additional decision support, by offering them expanded ability to specify their desired care.
- Employers who would like to specify a default sort option can now enable the function easily

SB1340 – CA Provider pricing audits

Last July, California passed a law barring providers from including anti-transparency clauses in contracts with health plans beginning with the first of this year. While generally excellent news for California healthcare consumers, it also allows providers to audit prices shown by services such as Castlight.

- A disclaimer will appear in both Search Results and on the provider's Detail Page. The changes will apply to both Web and Mobile. In the event a California provider disputes a price shown by the application, Castlight will issue an audit report to the provider similar to what it has done in the past.
