

## RELEASE NOTES

# July 2014 Release Notes

July updates include:

- **Castlight Mobile 1.1**
- **Specialty Pharmacy**

### **Castlight Mobile 1.1**

Last month, Castlight shipped its next-generation mobile app. designed to support Castlight's suite of products, the app will allow users to enjoy functionality on their phones similar to that of their computers. We remain dedicated to improving our users' experience by adding functionality over time. Our first such improvement shipped last week.

#### **Key enhancements**

- New login screen now includes a "Remember my email button."
- Dental insurance cards now included for customers with Castlight Dental
- Provider- and facility-level quality ratings now appear on search results pages and provider detail pages.
- "Avoid expensive provider" and "Stay in-network" alerts enabled in mobile Care Team.
- Users able to edit their Care Teams in mobile

### **Specialty Pharmacy**

We understand Specialty Pharmacy is a growing concern for a number of our customers. With the volume of specialty drugs expected to come to market over the next few years, we don't expect this issue to subside anytime soon. Beginning in the August release, Castlight will be launching its first Specialty Pharmacy enhancement. This first version will address nine chronic conditions we've chosen based on customer feedback. We'll continue to add conditions in the future. The nine conditions are:

- Rheumatoid arthritis
- Inflammatory bowel disease
- Multiple sclerosis
- Hepatitis C
- Breast cancer
- Lung cancer
- Colorectal cancer
- Diabetes
- High blood pressure

#### **Key enhancements**

- Enhanced messaging around prices for specialty drugs
- Site of Care guidance with pricing and convenience indicators
- Chronic conditions management education for high-spend specialty conditions
- Condition-specific Visit Guides for patients on Specialty medications
