

## RELEASE NOTES

# June 2015 Release Notes

June updates include:

- **Castlight Pulse**
- **Improvements to Quality Data**
- **Castlight Elevate**

## Castlight Pulse

Last week, Castlight launched its newest product: Castlight Pulse.

Features include:

- a dashboard for benefits leaders to understand how their employees are interacting with the Castlight platform
- real time data which enables the employer to effectively leverage data; thus allowing for redirection in order to operationalize in alignment according to their benefits goals

### Key information

- Castlight Pulse will be made available to customers on a rolling basis. We anticipate all customers having access to it by early 2016
- Offers mindshare data enabling companies to take a more proactive approach to their benefits administration
- Enables benefits leaders to filter by various dimensions in order to address specific employee segments

## Improvements to Quality Data

In an effort to empower our users, we have made a substantial investment in improving quality information available to users.

### Key Enhancements

- Facility-level surgical volume for 27 procedures
- Provider-level procedure volume data for 73 procedures, enabling employees find the right provider for their own situation
- Complications data for 27 specific surgical procedures, and new facility-specific surgical safety data across procedures

## Castlight Elevate

One of the products Castlight is most excited about this year is Castlight Elevate. Elevate is our solution to addressing behavioral health and designed to manage the entire lifecycle of mental health and substance abuse through several ways:

- Identifying at-risk employees through data-driven, targeted outreach while fully protecting privacy and PHI provisions
- Familiarizing employees with ways to addressing behavior health issues and conditions
- Helping employees shop for the right high-quality providers
- Mitigating the access problem employees might have with finding care, through tools such as Teletherapy

### Key features

- Behavioral health educational content
- Self-assessments
- Teletherapy
- EAP integrations
- Targeted recommendations
- In-patient facility shopping
- Computerized cognitive behavioral therapy
