

RELEASE NOTES

March 2015 Release Notes

March updates include:

- **Care Team**
- **Dental Orthodontia**

Care Team

Castlight has launched its new Care Team feature, which offers users the ability to build a personalized healthcare hub comprised of doctors and facilities that they and their family have visited in the past. The Care Team page shows users:

- potential cost savings
- opportunities to further build out their care team
- a myriad of other information aimed at helping one to make better healthcare decisions

Dental Orthodontia

Beginning with the March release, we will be integrating orthodontia services into Castlight Dental. The feature will be available to all customers who have purchased Castlight Dental.

Key information

- Users searching for orthodontia services in Castlight Dental will find them under three new procedure families: adolescent, adult, and transitional.
- Castlight will also illustrate the difference between dental benefits and orthodontia benefits by showing orthodontia accumulators on users' Past Care pages.
