May 2015 Release Notes

May updates include:

- **Castlight Mobile**

- **Home page redesign**

- **Care Team 1.1**

- **Quality 3.0**

- **Embedded registration**

Castlight Mobile

Castlight shipped its next-generation mobile application this week. Designed to support Castlight's suite of products, the app will allow users to enjoy functionality on their phones similar to that of their computers.

Key enhancements

- Streamlined user interface and improved navigation, giving one touch access to key features including insurance eCards and Care Team.
- Improved search & browse for care experience with more filters and options to help users find the care you're looking for.
- Updated Provider detail pages containing even more information to help users understand pricing, quality.
- If offered by the employer, we have also expanded our support for both Castlight Pharmacy and Castlight Dental.

Home page redesign

Coming in June deploy, Castlight will unveil its refreshed homepage to all customers and users. The new homepage will simplify users' interaction with Castlight and lay the foundation for a more personalized user experience as we continue to innovate.

Key enhancements

- More personalized content added
- Prominent search improves user experience
- Accumulator data remains in place with a simplified user interface

Care Team v1.1

Castlight will be rolling out Care Team to each of its customers in the June code release. Care Team is an innovative new feature we've developed, which allows users to see all of their family's providers, across specialties, in one location.

Key enhancements
- Improvements to the setup process designed to help more users fill out their Care Team and reduce attrition
- User's medical, pharmacy, and dental eCards more visible on the left rail

Quality 3.0

In an effort to empower our users to get the most value out of their healthcare, Castlight will be improving our clinical quality data in the June deploy. We will also be enhancing the way in which users see the data through new UI.

Key enhancements to hospital quality ratings:
- Surgical safety quality data switching to Consumer Reports.
- Going from 5 to 27 procedures with facility volume information
- Procedure-specific complications rates for 27 procedures

Key enhancements to physician quality ratings:
- Procedure volume information for 73 procedures

Embedded registration

Arriving in the June deploy, Castlight will offer customers a simple and flexible way in which to integrate Castlight registration to their annual enrollment workflows. This is an exciting new enhancement, streamlined to be fast, efficient, and keep employees moving through the flow.

Key Features
- We anticipate this leading to a major uptick in registration
- Will be available to all current eligible users as well as users who become eligible in the new plan year
