

JULY 2016 RELEASE NOTES

- Action Module
- Platform
- Mobile Experience
- Pharmacy
- Rewards

Action Module

- 1 new Action Opportunity
 - Weight Management: More than one-third of Americans are considered medically obese and more than half are overweight or obese. These conditions add substantial cost to medical care, in the form of comorbid conditions, and also are lifestyle challenges for the employee. The Weight Management opportunity would engage employees with weight loss programs, wellness programs, nutritionists, and other available resources.

Platform

- Added additional context around pricing sources to Provider Detail Page to support member questions (web and mobile)
- Improved search results for imaging and lab tests (Blues)
- NCCT procedure support expansion
 - Vaccines & Tests
- Added hours of operation for Castlight Guides to the login page

Mobile Experience

- Added “Support” option to global menu, which allows users to call Castlight Guides or their employer’s support number
- Plan Status page now fully supports in-network spending for all plan types, including fully collective plans subject to the ACA, embedded plans, and hybrid plans
- On iOS devices, if a user visits the m. site a one-time banner will appear prompting them to download the native app

Pharmacy

- Support for Pharmacy Narrow Networks

Engagement Based Rewards

- Engagement Based Rewards enhancement, allowing employers to configure incentives for viewing Past Care
- Enrollment process & eligibility improvements
