Enabling Members to Track Work-Related Activities

From an associate on the manufacturing floor to a nurse in a surgical ward, there are many members of the workforce whose jobs demand a lot of physical activity. This enhancement enables employees to manually log minutes of their on-the-job physical activity in the Castlight app and keep track of their progress. There are five distinct activity types that will now appear on the activity-logging page of the Castlight app:

- Manufacturing
- Warehouse
- Healthcare
- Retail
- Caregiver

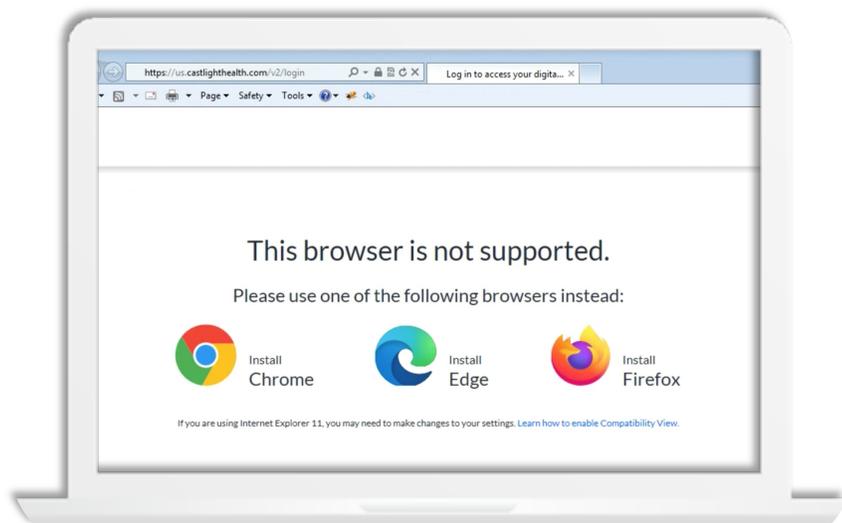

Enabling members to log their work-related physical labor helps acknowledge and reward their hard work, and also encourages additional exploration of healthy activities and Castlight features.

Available to all customers. ● ● ● ● ●

Castlight Sunsets Support for Internet Explorer

To provide best-in-class member experiences across our latest technology platforms and adhere to the highest security standards, Castlight will no longer support Internet Explorer as of May 13, 2022. This will impact the member desktop experience. Members who attempt to login with Internet Explorer will see the “unsupported browser” page and will not be able to use Castlight on the Internet Explorer browser.

Impacts all customers. ● ● ● ● ●
